

Pool Membership Guidelines

- This is now a permanent membership.
- We will limit the number of memberships to 15.
- This is a year-round (12 month) membership.
- Membership privileges: unlimited access to the pool, playground, tennis courts, clubhouse and all club sponsored activities that are not golf related. The membership has all the same amenities as our full membership, except access to the golf course. Pool members that want to play golf will be required to follow the same guidelines as other golfing guests which include paying a green fee. Pool members are allowed to play golf a maximum of five times per year.
- Pool memberships will be required to purchase a share of stock, pay a reduced initiation fee, and monthly dues as follows:
 - Stock: \$1,200.00
 - Initiation Fee: \$827.00 includes service tax (~60% of full membership)
 - Monthly Dues: \$106.00 includes service tax (~54% of full membership)
 - Monthly Restaurant Minimum: \$15.00
- The Board reviews the dues on an annual basis, they may be adjusted as required (the same process we use on Full & Clubhouse memberships).
- Membership Payment Options – A new pool member may opt to pay the initiation and stock fees over 5 years (age 41 and above) or over 10 years (age 40 and under). The annual fees for stock & initiation (\$2,027.00):
 - 5 years - \$405.40 per year.
 - 10 years - \$202.70 per year.
- Pool members that want to reclassify their membership to a full membership may do so by notifying the Club Manager. All Full membership fees will apply. Reclassifying back to a pool membership will only be allowed with the Board's approval.
- This is now permanent membership and is in the bylaws as such. Full Active or Clubhouse Members may choose to change to a Pool Membership, regardless of the number of Pool Members (If we have 15 Pool members and 5 Full Active members want to reclassify, we will allow it). Full Members or Clubhouse members that are reclassifying to a Pool Membership will not be refunded the difference in Initiation Fees.
